

THE PAUL STREET BOYS

S3
 T1-6
 L1

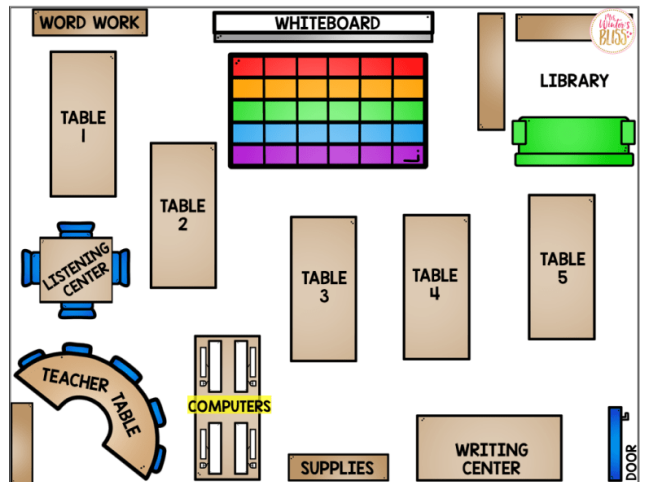

Draw a map of the classroom or the schoolyard!

Draw a map of the surroundings of the school! Collect the **GPS** coordinates of these points!

You can use paper and pencils, or you can cut objects out of color paper and stick them on the map with glue. You can use computer graphics, too.
 Pay attention to the scale !

Make challenges to each other – how to get from one point to the other! First move in the classroom for real, then just show the route you'd take on the map!

Example: Walk from the computers to the library!
 (solution: walk steps forward, turn right, walk steps forward, turn left, walk steps forward)
