

# THE PILGRIMAGE STORY OF ST. JAMES

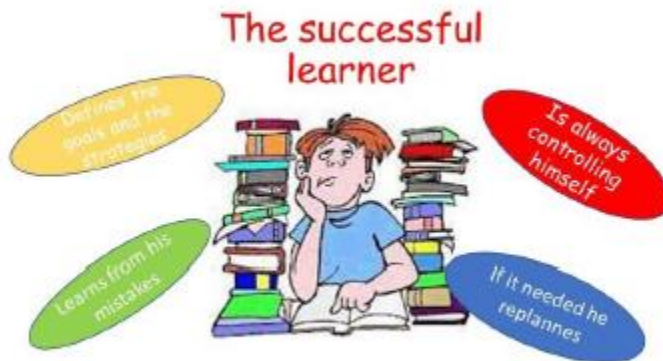

## Group:

S2  
T1-5  
L3-4

### Plan your robot!

- Take as many of the character task cards as you need and fill in the gaps to identify your tasks!
- For more help, fill in the robotic task card!
- Plan the robotics parts you will need!
- Draw your planned robot!

Check how the needed parts work!  
Use the core program ideas!  
Dare to experiment!  
In case of need make new task cards or robotic cards to clear uncertainty!

### Test your robot!

- Does your robot work as it suppose to?
- If YES, could you improve anything on it? What?
- If NO, what is the problem? How can it be solved?
- Make **NEW** task cards or robotic cards to clarify the uncertainty!
- Modify your robot or your program and test it again!

*Do not worry if you did not finish the task: you can continue next time!*
