Determine exactly where you live

Where do you live exactly?

Glue the appropriate galaxy, planet, continent, state, federal state, district, city, district, street, ... onto paper cups.

Build towers with paper cups and compare your towers.

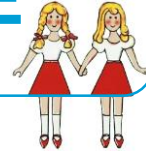

Seebühl am Bülhsee
 Kästners original
 drawing from the first
 edition

Work with the silent card!

- Where do the twins live? Mark the cities on the map.
- Estimate the distance between cities using the scale.
- Google the correct distance between Munich and Vienna.
- Calculate your estimation error in percent!
- Look at the map with the two markings. Where do you think Seebühl am Bülhsee would most likely be located? Which real towns can be considered as model places for the novel?
