

Some ideas – Cereal box castle craft

You'll need:
any empty cereal box
scissors
pencil
regular tape

Resource:
<https://rightnowcrafts.com/new-blog/castle>

1

Open the bottom flaps of the box, and open up the side seam by gently separating it.

2

Draw a big T here for the side walls and the door on the other panel.

3

Tape the side seam closed. This is easiest if you flatten the box down like this.

4

Cut the door, leaving the sides as hinges, and fold the doors open.

5

Cut up the stem of the T on the back, then out to each side, and open out the walls of the castle.

Draw four tooth lines on each wall, and cut out the teeth.

6

Draw windows and decorate your castle.
