Make a recyclable toy

b.)

Make a game like the one in the picture! Make up several different game rules! The original idea for the game can be found on the following page.

You can use glue, plastic caps, empty boxes etc.

Make your own recyclable board game

This game can be found on the following website. The game board and tokens can be downloaded from there. Print and cut them out, then the game can begin!

<https://sugarspiceandglitter.com/wp-content/uploads/2018/08/Recycling-Game-1.pdf>

Each player must collect ("recycle") one token from each category of recyclable material:

- tin/aluminium
- plastic
- glass
- Paper/cardboard
- compost

Each player starts from the centre of the board game and moves with one cube around the board (The game can be played by 2-4 players)

When a player moves to a large circle, he takes a corresponding token.

You move around the board until you have collected all the colours/categories of the marker.

Once you have collected all five categories, travel up one of the "spokes" or paths to the center to recycle your tokens and win the game!

You can use glue, plastic caps, empty boxes etc.
