

MASTER EDER AND HIS PUMUCKL

S20
T1-3
L1

Key rings or fridge magnets

You will need:

- Recycled plastic film
- Felt-tip pens or coloured pencils
- Punch pliers
- Key ring
- Magnetic strip

This is how it's done:

- Place the plastic film on the template and trace the lines with a felt-tip pen or coloured pencil.
- Colour in the figure according to your ideas.
- Punch a hole in the film if the figure is to be used as a hanger, then cut it out.
- Place the pieces in the oven so that the foil shrinks. This will make the figures thicker and more stable and the colors more intense.

Also suitable as
fridge magnets!
