

The Little Prince

The Geographer's Planet

 The sixth planet was bigger	 A geographer lived there	 The Little Prince asked many questions	 He was fascinated by the job
 He listed seas, mountains, rivers...	 But he didn't know his own planet	 He never went outside	 He only wrote what explorers said
 Suddenly, the geographer got excited	 The Prince was an explorer!	 The Prince described his planet	 He spoke about his flower
 The geographer refused to write it	 "It's ephemeral," he said	 The Prince felt sad and regretful	 But he looked up and left for Earth
